

AN AGED PIONEER CALLED BY DEATH

Samuel Whitney Richards, 85 Years Old, Dies After Short Illness.

ACTIVE IN CHURCH WORK

HE SERVED SEVERAL TIMES AS MISSIONARY IN EUROPE.

Samuel Whitney Richards died at his home, 457 Fourth avenue, at 10 o'clock yesterday morning, of general debility. He was 85 years old. Mr. Richards was one of the leading figures in early Utah history. As an official of the Mormon church, he was one of the most active men in the state, and in the earlier days held numerous public civic and court positions. His death came after two weeks' severe illness, preceded by sev-

SAMUEL WHITNEY RICHARDS.

eral years of ill health. During his last years he had been an active worker in the Mormon temple.

Mr. Richards was born in Richmond, Mass., August 19, 1824. He was a brother of Franklin D. and Colonel Henry F. Richards. History shows him to have been an assistant engineer in charge of forty men employed in the building of a railroad in Massachusetts when he was but 18 years old.

He joined the Mormon church when 14 years old, and five years later he moved with his parents to Nauvoo, where he took up work on the temple when being built by the Mormons there. In 1844 he was chosen by Joseph Smith, leader of the Mormons, with a small squad of young men, to explore the west, the idea being to blaze a trail for the westward migration of the Mormon band. The death of Joseph Smith dissipated these plans, and Mr. Richards remained at Nauvoo. In 1846 he married Mary Haskin Parker, and several months later was sent to England on a mission. He returned two years later, and came on to Salt Lake, then a village in the making, in 1850.

Several months after his arrival he was made a member of the first city council, and also appointed a member of the board of regents of the old University of Deseret. To Mr. Richards' legal ability was due the first city ordinances providing for the government of Salt Lake.

Sent to Europe.

In 1854 he was again sent to Europe by Brigham Young, to succeed his brother, Franklin, as head of the European mission. While in that capacity he was summoned before Queen Victoria and ordered to appear before the common commission to give information and to offer suggestions for the improvement of the emigration laws of Great Britain. Many of his recommendations were adopted.

Two years later he returned to Utah, only to be again sent to Europe after a short military career here. He was back again in 1858, and for several years served in the legislature.

His first wife died in 1860. She was the mother of five children, three of whom survive their father.

During the building of the great Mormon temple, Mr. Richards was actively engaged in this work. In 1885 he was again called into the mission field and made president of the entire eastern mission. The last few years of his life were spent in temple work.

In all, Mr. Richards' family numbered nineteen living children, ninety-four grandchildren, and thirty-nine great-grandchildren, while nine children have preceded their father to the grave. Mrs. Mary Ann Parker Richards survives her husband.

The funeral services have been arranged for Sunday afternoon at 2 o'clock at the Twentieth ward chapel, with burial in the City cemetery.

The remains may be viewed in the home between 11 and 1 o'clock Sunday.

Do you kodak? We finish and also sell the supplies. Salt Lake Photo Supply Co., 177 Main street.

"Royal" Stale Bread Depot. Open 3 to 5 p. m. daily. Entrance on Third South. Good bread very cheap.

Saving and Investing

You may be able to systematically save a portion of your income, but unless you make your savings earn a substantial rate of interest you do not obtain full benefit from your labor. Invest your surplus funds in our Secured Certificates and they will earn 6 per cent per annum, payable twice a year. These Certificates are secured by first mortgages on improved real estate in Salt Lake City.

MARITAL TROUBLES REVEALED IN COURT

Judge C. W. Morse Grants Two Divorces and Holds Others Over.

CRIPPLE DEFENDS SELF

WOMAN ADMITS DAUGHTER APPEARED IN TIGHTS ON STAGE.

Only one divorce was granted by Judge C. W. Morse yesterday afternoon, and the mill worked sluggishly throughout the session. In the morning Judge Morse granted one decree, making only two for the day.

In the morning Mary E. Angell received a decree separating her from Albert F. Angell, and separating Albert from household furniture valued at \$700, and \$420 in real money, which is to be paid to the wife in lumps of \$35 each month until it runs out. The household goods and the money is alimony, and the attorney of Mrs. Angell will receive \$50. The Angells were married in Salt Lake on July 16, 1887.

Seth Johnson filed his suit for divorce yesterday afternoon, and soon afterward received a decree, as the result of the desertion of his wife, Tessie, last October. They were married on May 15, 1907, in Salt Lake. The wife left and is now living in Kanab.

Lulu Sparks appeared in court with a chunky little baby, mostly hidden in knit jumpers. She married Henry Sparks, a machinist at the Boston Consolidated smelter, here May 6, 1890, and has started suit for divorce. Judge Morse made an order yesterday that Sparks is to pay his wife \$25 a month as temporary alimony until the divorce case is tried. Both husband and wife live in Garfield.

Colin E. Stokes, a cripple, who lives at 1149 Milton avenue, appeared in court to defend himself against the divorce action of his wife, Hannah Louisa Stokes. They were married here on June 16, 1888, and have three children. Stokes explained to the court that he did not have money with which to engage an attorney, and will handle his case himself. Mrs. Stokes said she had obtained employment for her husband several times, but that he had refused to keep them, and had spent the money he earned for intoxicants. She said she had supported him most of the time for the last three years.

Declares He Worked.

Stokes claimed that he had done all of the rough work in the Walker bank building, where his wife is janitress, but she denied this, with the exception of one month during the summer, when she said she was resting. The case was postponed for two weeks.

Ella M. Rounds did not satisfy Judge Morse that her husband, William S. Rounds, had refused to provide for her, and the case was continued for another week for further evidence. They were married in Buffalo, N. Y., on October 25, 1905.

Ellen P. Williams is suing Miles L. Williams for a divorce, and Judge Morse granted a temporary alimony of \$4.50 a week until the case is fully tried. They were married on June 28, 1907, and Mrs. Williams says her husband drove her out of their home at 2555 Fifth East street on July 16, 1909.

That she allowed her daughter, 17 years old, to appear as Sapho in tights with a company traveling through the southern part of the state, was the admission of Pauline Baker, who is suing J. A. Baker for a divorce. Baker came back in an answer and cross-complaint, in which he charged his wife with many indiscretions, and asks the court to have the custody of his two youngest children: Rena, aged 17; Nina, aged 16, and Leroy, aged 4. Mrs. Baker said the cross-complaint is "defamatory and libelous," and struck at her fair name and those of her daughters. She said Rena was not with a "strolling" troupe, but that they were "actors." She admitted Rena played the part of Sapho at one time, and appeared in tights on stage. She said, however, that she never smoked cigarettes or allowed her daughters to smoke them. She also denied that Nina or Rena had ever come home drunk. The case was continued until next Friday.

GROCERYMAN GOES SOME

Highwaymen Threaten Him With Revolver and He Obeys Command With Alacrity.

Two Salt Lake highwaymen developed two exponents of the law of the road when they stopped a grocery store proprietor of a grocery store at Sixth West and Second North streets, to run a half-block on the threat in the rear of a car, and record time he would be stopped by a bullet. The holdup men were somewhat nervous, but they did not obtain any money from Shingleton.

Shingleton was closing the shutters on the outside of his store at about 7 o'clock last night, when a gun was suddenly shoved in his face and two tall men commanded him to throw up his hands. Shingleton complied, and his clothing was searched without any money being found. The men then forced Shingleton to walk ahead of them for half a block and told him if he didn't beat all known records running back to his store they would see how expert they were at hitting a flying target. Shingleton says no record could stand against the three men, who were armed with revolvers. The police were notified of the holdup, and were on the scene about ten minutes later, but obtained no clue to the highwaymen.

A private safe can be rented in the fire and burglar proof vault of the Salt Lake Security & Trust Co., 32 up Main street, \$2.00 per year and upwards.

Y. W. C. A. HOLDS SOCIAL

Brooks Arcade. Rest Rooms Are the Scene of Most Pleasant Affair.

Members of the Young Women's Christian association and their friends had an enjoyable time last night at the monthly social, held in the rest rooms and lunch room of the association, in the Brooks arcade. The socials, which are held on the last Friday evening of each month, are becoming quite popular among the members and their friends, and there was even a larger attendance than had been expected last night, considering the inclement weather.

A session was held in one of the rest rooms during the early portion of the evening, those present listening to an interesting paper by Mrs. C. H. Blanchard, on the subject of "The Madonna in Art." Mrs. L. M. Bailey, chairman of the social committee of the association, which has charge of the socials, presided at the evening's session. After listening to the paper, the members adjourned to the lunch room, where refreshments were served by those in charge of the social.

Highest price paid for strictly fresh eggs. THE ROYAL CAFE.

A SALT LAKE BOOSTER

IT IS doubtful if any public spirited movement for the advancement of Salt Lake or Utah can be found in which Orson H. Hewlett is not an active and energetic worker, and his record along these lines includes unselfish service of time and talent as an officer or a director in the various organizations whose mission is in one way or another to benefit the city.

Mr. Hewlett is secretary and manager of the Hewlett Brothers company. He has served in the state legislature, three terms as president of the Utah Association of Manufacturers and Merchants; president of the Salt Lake Automobile club, and he is vice president of the Civic Improvement League, and a member of the executive committee of the Utah Good Roads association. Mr. Hewlett is also a member of the Commercial club and he is one of the active workers for Salt Lake in his connection with the Traffic Bureau.

In his work for road roads in Utah Mr. Hewlett has been particularly active, and in the last two years he has devoted considerable time to the work of the good roads association in arousing public sentiment and official action in the movement for better highways by building new roads and taking care of the present ones. As one of the prime movers in organizing the Utah Manufacturers and Merchants association, Mr. Hewlett has earned the respect and gratitude of the producers of Utah, as through that organization and its successor, the Utah Manufacturers' association, the use of home products has been stimulated to a most gratifying extent. In the present food and industrial exposition Mr. Hewlett has also taken an active part in the arrangements and his booth is one of the most popular in the exposition building.

ORSON H. HEWLETT.

BABES PRESENT DESPITE WEATHER

Baby Show Is Postponed and Other Big Features Are Arranged.

Pluvius, with allies in the snow king and his cohorts combated with Manager Trempe of the food and industrial exposition yesterday—and Manager Trempe, sorry to say, was routed. That was because, however, Mr. Trempe underestimated his own force and really quailed under the blizzard.

For instance, when yesterday about noon Manager Trempe saw the snowflakes falling he, not knowing the temperament of his cohorts, called for the snow king, and said, "This is too bad weather for the babies. We'll have the baby show postponed, and that will give the weather man three days to get things held over." Comforted in the thought that he was doing something of good to the tiny tots, Manager Trempe went on his way smiling, to return in gazing astonishment when he learned that 33 babies had been registered in the show, and that the baby show was on.

The number kept increasing until there was a total of 117 babies, chubby, fat, prim, dainty and winsome. But he had earlier given his word that the baby show was postponed until Monday, and he refused to back out of it.

The committee on municipal laws and streets, but most of the councilmen discussed the proposed plan. The electing of the Salt Lake road will be one of the first steps of the management, but not to be done until after agreement is made with the council regarding some of the most vital points. It is said that satisfactory arrangements cannot be made with the Light & Railway company for track usage for the Salt Lake cars. The plan of the Salt Lake road will be laid over the viaduct set with one rail between those of the street car company and the outside, so as not to use the present rails.

From the tone of the councilmen last night, however, it is believed that the city will insist on the building of a new viaduct over the Short Line tracks so that one viaduct can be used for street cars and the other for vehicles. This feature, however, will be opposed on the ground that it will make the cost to the city too high.

As the water in City creek on North Temple street will soon be carried all the way through a conduit, it is probable that the city will insist on the building of a conduit and thus not take up too much of the street. The whole matter will be decided by the council next Friday for more discussion.

Before this was taken up, the municipal laws committee approved the request of the Light & Railway company for the use of the viaduct set with one rail between those of the street car company and the outside, so as not to use the present rails.

At the time of the councilmen last night, however, it is believed that the city will insist on the building of a new viaduct over the Short Line tracks so that one viaduct can be used for street cars and the other for vehicles. SALT LAKE RAILWAY FRANCHISE HEARD

Council Considers Request and Asks City Attorney About Legality.

After discussing features of the proposed new franchise for the Salt Lake road, members of the city council last night sent the matter to the city attorney to learn if the city has the right to grant a franchise for three tracks on a viaduct over the Short Line tracks, and to run two more tracks on North Temple street between Third West and Main streets.

The company wants to lay an extra track to the double track of the Utah Light & Railway company on North Temple street west of Fifth West street and to run two extra tracks on the viaduct over the Short Line tracks. They also desire to run two more tracks on North Temple street between Third West and Main streets.

The committee on municipal laws and streets, but most of the councilmen discussed the proposed plan. The electing of the Salt Lake road will be one of the first steps of the management, but not to be done until after agreement is made with the council regarding some of the most vital points. It is said that satisfactory arrangements cannot be made with the Light & Railway company for track usage for the Salt Lake cars. RESCUE CORPS IN UTAH COAL MINES

Inspector Pettit Tells of Tests Being Made to Save Lives.

VISITS MANY COLLIERIES

PROBES FATAL ACCIDENT AT SUNNYSIDE WHERE ROOF FELL.

J. E. Pettit, state coal mine inspector, arrived home Friday from an inspection trip which occupied nearly all of November. Mr. Pettit will visit the mines at Coalville during the coming week, will look at the gilsonite mines in Utah county and inspect other mines before beginning his annual report, which likely will be out about New Year's. The fiscal year ends November 30.

Mr. Pettit is asking mining companies to send estimates of workmen during the fiscal year, the amount of powder used and the number of men and animals employed.

Mr. Pettit recently conducted an examination at Price, which resulted in certificates being granted to five mine foremen and one fire boss.

One of the most peculiar accidents which has come under the notice of Inspector Pettit, the first of its kind in Utah, occurred at No. 4 of the Sunnyside mines on November 2, resulting in the instant death of one Austrian and the subsequent death of two others. Eleven men were working in the third right entry of the mine, when a "bounce" occurred. The men were removing the "pillars" between two galleries. A fracture of the roof and a subsequent falling down of the weight of the strata above caused the "bounce," coal being thrown out on each side of the pillar.

During the last week Mr. Pettit went to Castlegate, where the Utah Fuel company has been testing oxygen apparatus for rescue work.

Under the direction of H. G. Williams of the Utah Fuel company, Manager Mangan of the Oxygen company burned about five pounds of sulphur in an abandoned working of the mine. Several of the officials present put on the oxygen helmet and were able to spend some time in the atmosphere, vitiated with sulphur, without suffering ill effects.

It is expected that the Utah Fuel company and other companies of the state will purchase some of the appliances and have a corps of trained rescuers at the mines. A rescuing device, which pumps oxygen into the lungs, is being tested. Germany, Austria, Hungary and England are using these appliances. Only 174 are in use in the United States. The taking off of the duty on rescue appliances by the last congress has had the effect of reducing the cost in importing them from Germany.

ORGANIZE TO AID CHILDREN TO PLAY

Association Formed to Investigate Conditions in Public Parks of City.

With the purpose of securing parks, laying out playgrounds for the children and following out in detail the plan of similar associations organized throughout the country, a public parks and playgrounds association was formed last night at a meeting held at the home of Mrs. Williams, No. 17 Thirteenth East street. George W. Wallace was chosen as chairman, and Miss Kate Pollock, E. Stephens and J. L. Letcher. This committee will report at a subsequent meeting of the association.

The association will investigate city conditions relating to playgrounds, study the methods of making the playgrounds a successful one and apply the idea in the city. It will seek among other things to have the city assume charge of the Warm Springs as a resort, urge the establishment of a summer swimming school, and to have the city parks laid out in City Creek canyon and other portions of the city.
